Rebecca Arcesati, an analyst focusing on China-Europe innovation at think-tank Merics, says Beijing's proposals to restrict technology transfer were a "counter" to the US and EU's attempts ...

The prices of the solar supply chain continued to hit new lows in 2023 due to overcapacity in China. The relentless capacity buildup, which the International Energy Agency (IEA) says accounts for 75-95% of the global solar production capacity, is expected to exacerbate the supply glut and drag prices across the solar supply chain down as more ...

Boutique Power can supply and install systems at any location, both within and outside of our local area, which is the Atherton Tableland in Far North Queensland. Our team is experienced, professional and fully accredited. Grid ...

Strong state support and huge private investment have made China's solar industry a global powerhouse, but it faces new headwinds, from punitive tariffs abroad to a brutal price war at home.

The China Photovoltaic Industry Association (CPIA) has teamed up with executives from Tier 1 solar energy manufacturers to reach a price agreement and establish a price floor for solar products.
