How much does an eV conversion cost?

While we can't give you an exact number, we can give you some ballpark figures based on average prices in the US. According to EV West, one of the titans of the EV conversion world, the average cost of a complete conversion kit is between \$7,000 and \$15,000, minus the donor car and battery you choose.

How much does a battery cost?

The cost of the battery can vary from \$100 to \$500 per kWh, depending on the type and quality of the cells, and the supply and demand. So, the cost of a 30 kWh battery can be between \$3,000 and \$15,000, while the cost of a 100 kWh battery can be between \$10,000 and \$50,000. To answer your question, yes, there is a huge price range.

How much power does a car conversion kit have?

The conversion kit has a motor of 15KW power. The battery capacity changes as per the models of the cars. For hatchback the battery capacity is 12kwh and for sedan it is 15kwh. As per individual needs, the company also provides customized conversion kits. The retrofitting of the car takes place at the company's facility unit in Hyderabad.

Should you retrofit your car with an electric conversion kit?

Retrofitting your car with an electric conversion kit is gaining popularity, as it provides a cost-effective way to transition to electric mobility. Several companies now offer conversion kits at competitive prices, allowing you to upgrade your car without the high cost of purchasing a new electric vehicle.

How much does an electric car conversion kit cost in India?

The approximate cost of the kit is 4 lakhs. It may seem an expensive investment but considering long-term savings after switching to an electric car is unquestionable. The price of the E-trio electric car conversion kit is starting at 4 Lakh in India.

How difficult is it to install a car conversion kit?

Installation is more challenging than it seems. The conversion kit interferes with the existing drivetrain of your car. No battery nor charger is included in the package. You will need at least two kits, as one kit would fit on each tire. It is specially designed for those people who want to convert their gas-powered cars to electric vehicles.
