Should you buy used solar panels?

However, the upfront cost of a new solar system can be daunting. This is where used solar panels offer a compelling solution. Buying used solar panels can cut your initial investment by 50-80% compared to new panels. While they may have slightly lower efficiency due to age, the cost savings often outweigh this drawback.

Where can I buy used solar panels?

eBay: This well-known platform offers a wide selection of used solar panels. When searching on eBay, use filters to narrow down your options by wattage, voltage, and location. For example, searching for "250W used solar panels" in your state can help you find local deals. Look for sellers with high ratings and detailed product descriptions.

What should I look for when buying used solar panels?

When buying used solar panels, thorough evaluation is crucial. Here's what to look for: Solar panels typically degrade by about 0.5-1% per year. A 10-year-old panel might have 90-95% of its original efficiency. Ask for the panel's age and, if possible, its performance history. Look for cracks, discoloration, or frame damage.

How do I find a solar installer near me?

To find local installers, search for "solar installers near me" and call a few to inquire about used panels. Craigslist and Facebook Marketplace: These platforms are popular for individual sellers. Prices can range from \$0.10 to \$0.75 per watt, significantly lower than new panels.
