

How to install the blade battery charging cabinet

How do you connect a battery charger to a door?

Add each of the chargers to the door and route the wires inside. Plug in each of the wires into the power strip and tie up any extra wire using velcro cord organizers. For the smaller chargers that have a large plug, I placed them on the top shelf and plugged them into the power strip.

How do you mount a Ryobi charger to a wall?

In fact, the Ryobi charger was so close to the top that I just sent the wire in over the top. Make a hole in the side of the cabinet. This is where the power strip plug will exit to be plugged into the wall. There are multiple ways you can mount the charging station to the wall: Use a screw through the back into a stud. Using a French cleat.

How do you mount a charging station to a wall?

There are multiple ways you can mount the charging station to the wall: Use a screw through the back into a stud. Using a French cleat. I decided to use a French cleat because I didn't have two studs accessible in the space where I needed to add the cabinet.

How do you attach a KREG door to a cabinet?

Attach the two shelves to the side, ensuring that the spacing between the shelves is accurate. Attach the other side to the back and the shelves. Attach the hinges to the door using the Kreg hinge jig. Attach the door to the cabinet aligning the top of the door to the top of the cabinet.

What temperature should a battery cabinet be protected from?

The battery cabinet should always be protected from the outside weather and sunshine. In order to maximize battery service life time, the recommended operating temperature range is from +20 to +25 oC. Hydrogen and oxygen gases are emitted from batteries into the surrounding atmosphere during charge, float charge, heavy discharge, and overcharge.

What if the battery cabinet is too dusty?

Excessive amount of dust in the operating environment of the battery cabinet may cause damage or lead to malfunction. The battery cabinet should always be protected from the outside weather and sunshine. In order to maximize battery service life time, the recommended operating temperature range is from +20 to +25 oC.
