

# Ministry of Industry and Information Technology's new energy battery query

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

Should lithium-ion battery companies invest in technology?

Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs. They are required to spend at least 3 percent of the revenue on R&D and technological upgrades, the draft guideline said.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

China will release a future industry development action plan in 2024, focusing on cutting-edge industries such as humanoid robots, quantum information and 6G, China's Ministry of Industry and ...

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs ...

On December 15, 2023, the Ministry of Industry and Information Technology (MIIT) issued a solicitation for opinions on the "Administrative Measures for the Comprehensive Utilization of ...

The rules, proposed by the Ministry of Industry and Information Technology, are designed to curb unchecked expansion and promote sustainable and high-quality development within the sector. The proposed regulations address several key issues facing China's lithium battery supply chain, including unbalanced regional development, mismatched ...

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to ...

Information Technology (MIIT), Ministry of Science and Technology (MOST), and National Development and Reform Commission (NDRC) jointly released A Notice on Optimizing Fiscal Subsidies for Promoting New

# Ministry of Industry and Information Technology's new energy battery query

Energy Vehicles (hereafter "the Notice").<sup>1</sup> In the Chinese context, new energy vehicles (NEVs) refer to battery

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand...

BEIJING, Dec. 24 -- China's lithium-ion battery industry sustained rapid expansion in the first 10 months of 2022, official data showed. The total output of lithium-ion ...

BEIJING, Dec. 24 -- China's lithium-ion battery industry sustained rapid expansion in the first 10 months of 2022, official data showed. The total output of lithium-ion batteries exceeded 580 gigawatt-hours (GWh) in the January-October period, data from the Ministry of Industry and Information Technology showed.

On December 15, 2023, the Ministry of Industry and Information Technology (MIIT) issued a solicitation for opinions on the "Administrative Measures for the Comprehensive Utilization of New Energy Vehicle Power Batteries (Draft for Soliciting Opinions)," with the feedback period running from December 15, 2023, to January 15, 2024. The document ...

China's Ministry of Industry and Information Technology (MIIT) on Wednesday issued draft industry standards on the comprehensive utilization of used new-energy vehicle (NEV)...

China's Ministry of Industry and Information Technology (MIIT) is working on guidelines for the battery-swapping model for new energy vehicles (NEVs), local media reported citing MIIT spokesperson Zhao Zhiguo.

China's Ministry of Industry and Information Technology (MIIT) on Wednesday issued draft rules for the country's lithium-ion battery industry, aiming to guide companies to reduce...

On December 10, the Ministry of Industry and Information Technology of the People's Republic of China issued the "Lithium-ion Battery Industry Specification Conditions (2021 Edition)" (hereinafter referred to as the "Specification") and the "Lithium-ion Battery Industry Specification Announcement Management Measures (2021 Edition)". Compared with the previously ...

According to estimates by industry associations and research institutions, the national output of lithium-ion batteries exceeded 110 GWh in the first half of the year, an increase of more than 60 percent over the same period last year.

Battery link, January-June energy storage lithium battery production of more than 110GWh. new energy vehicles with power lithium battery installed volume of about ...
