BYD is a Chinese multinational company that operates in a variety of industries, including electric vehicles, energy storage systems, solar panels, and more. Home; Battery Technology ; Electric Vehicles; No Result

Lead-acid batteries, commonly used in vehicles, contain an electrolyte consisting of a dilute sulfuric acid solution. This solution is typically made up of water and sulfuric acid in a ratio of around 3:1. The lead-acid battery's electrolyte is filled with the mixture, which reacts with the lead plates to produce the necessary electrical energy.
